SURNETICS — WEBSITE REVISION REPORT

March 13, 2026

SECTION 01

Home Page Revisions

Three targeted changes to the homepage — removing outdated badge text, correcting the flow animation direction, and updating the team bio for accuracy.

CHANGE 1 OF 3

Remove Patent Badge from Hero Section

The "US Patent 9,968,930 B2 · Active" badge pill that appeared above the headline in the hero was removed. The patent information is fully represented elsewhere on the site (IP Portfolio page, stats bar) and the badge added visual clutter to the hero without adding strategic value.

CHANGE 2 OF 3

Correct Flow Direction in Hero Animation

The microfluidic channel animation labels were swapped to accurately represent the physics. Fluid self-propels from a region of **Low Surface Energy toward High Surface Energy** — matching the mechanism described in the patent and the Technology page text.

BEFORE (INCORRECT)

Left: HIGH SURFACE ENERGY → Right: LOW SURFACE ENERGY

AFTER (CORRECTED)

Left: LOW SURFACE ENERGY → Right: HIGH SURFACE ENERGY

CHANGE 3 OF 3

Update Brian Babcock Bio — Team Strip

Updated the credential line in the "Team Behind the Technology" strip at the bottom of the homepage.

BEFORE

Registered US Patent Agent · Vanderbilt B.S./M.S. ChemE · Argonne National Laboratory

AFTER

Microfluidics and Coatings Expert — Registered US Patent Agent · Vanderbilt B.S./M.S. ChemE

SECTION 02

Technology Page Revisions

Two corrections to the Technology page — the gradient diagram direction and the patent protection date.

CHANGE 1 OF 2

Correct Flow Direction in Channel Diagram

The gradient channel cross-section diagram on the Technology page had its energy labels swapped — aligned to match the hero animation and the correct underlying physics. Flow arrow direction (left → right) is unchanged; the labels now correctly read LOW ENERGY on the left and HIGH ENERGY on the right.

CHANGE 2 OF 2

Update Patent Protection Horizon — "The Only Commercial Source"

The protection date in the "The Only Commercial Source" section was updated to reflect the full portfolio protection window including continuation applications.

BEFORE	AFTER
...patented platform with a 2034 protection horizon.	...patented platform with a 2041 protection horizon.

SURNETICS — WEBSITE REVISION REPORT

March 13, 2026

SECTION 03

IP Portfolio Page Revisions

All three pending patent applications updated to use published US application numbers, each with a direct link to Google Patents.

3 APPLICATIONS UPDATED

Application 1 — Diagnostic Device with Integrated Sampler and Holder

BEFORE	AFTER (WITH GOOGLE PATENTS LINK)
US Pat. Appl. 17/114,390	Published Application US 20210170405

Application 2 — Microfluidic Products with Controlled Fluid Flow

BEFORE	AFTER (WITH GOOGLE PATENTS LINK)
US Pat. Appl. 18/826,831	Published Application US 20240428117

Application 3 — Diagnostic Device with Integrated Sampler and Holder

BEFORE	AFTER (WITH GOOGLE PATENTS LINK)
US Patent Appl. 19/051,462	Published Application US 20250177980

SECTION 04

Markets Page Revision

One change — the blue banner strip at the bottom of the page was removed in full.

CHANGE 1 OF 1

Remove Blue Banner Strip

The thin blue bar reading "US Patent 9,968,930 B2 · Active Until 2034 · Cited by 44 Patents · View IP Portfolio →" was removed from the Markets page. The information was outdated (2034 date) and redundant with content presented elsewhere in the site.

SECTION 05

About Page Revision

The Company History and Key Milestones timeline section was removed from the About page.

CHANGE 1 OF 1

Remove Company History / Key Milestones Section

The full timeline section — including the "Company History" heading, "Key Milestones" heading, and all four milestone entries (2014 PCT Filing, 2018 Patent Grant, 2018–2023 Portfolio Development, 2024 Commercialization) — was removed from the About page. The page flows directly from the Team section to the CTA.

SUMMARY

Complete Change Log

All 10 revisions implemented and deployed to production.

PAGE	CHANGE	TYPE	STATUS
Home	Removed "US Patent 9,968,930 B2 · Active" hero badge	Content removal	✓ DONE
Home	Corrected hero animation: Low → High surface energy flow	Label correction	✓ DONE
Home	Updated Brian Babcock bio credential line	Copy update	✓ DONE
Technology	Corrected channel diagram: Low → High energy flow direction	Label correction	✓ DONE
Technology	Updated protection horizon: 2034 → 2041	Date correction	✓ DONE
IP Portfolio	Updated pending application 1 to US 20210170405 + Google Patents link	Number correction	✓ DONE
IP Portfolio	Updated pending application 2 to US 20240428117 + Google Patents link	Number correction	✓ DONE
IP Portfolio	Updated pending application 3 to US 20250177980 + Google Patents link	Number correction	✓ DONE
Markets	Removed blue patent banner strip	Content removal	✓ DONE

PAGE	CHANGE	TYPE	STATUS
About	Removed Company History / Key Milestones section	Section removal	✓ DONE

All changes are live on surnetics.com

All 10 revisions were applied to the codebase, built without errors, committed to the GitHub repository (watchdogpedro/surnetics), and deployed to production via Vercel. No further action required.
